

Cost-effective

OPERATIONS AND INFRASTRUCTURE

OUR Operations and Infrastructure Solutions provide the depth of talent and expertise required to create, implement or enhance major components of your IT systems. We can help you choose the best technology or strategic direction to meet your business objectives and then coordinate all the resources needed to execute your plan. Our Operations and Infrastructure Solutions provide you with a cost-effective, hands-off management option for running any area of your IT operation.

MANAGED STAFFING

Our partnerships provide you with a recognized leader in recruiting, deploying and managing the IT work forces required to execute large technology projects. Our comprehensive screening and training approach eliminates the continuity, quality and security concerns that hamper successful initiatives. Risk mitigation, supplier management and web-enabled systems are a few of the additional cost benefits to our clients.

ENTERPRISE INTEGRATION PARTNERS

We have strategic partnerships with some of the most respected names in consulting and technology integration. We leverage our expertise to bring the most advanced strategic planning and execution capabilities to bear for our clients.

PAYROLLING

We can deliver a special staffing program for clients who have direct contractors and are seeking immediate savings, greater control, and reduced risk. Our Payroll Plus Contract Plan (PPCP) is advantageous for companies with directly contracted consultants or those with a mix of direct consultants and multiple vendors. We will work with the existing resources, negotiate savings, put proper controls in place, and be your on-going partner to handle your IT initiatives smoothly and securely.
